## 1. Overview of Operating Results

### (1) Report of Operating Results

The Japanese economy in the first half of the FY06/2020, from July to December 2019, has been on a moderate expanding trend. Business fixed investment has continued on an increasing trend and private consumption has increased moderately despite of effects of the consumption tax hike.

January 10 2020, Ministry of Economy, Trade and Industry released that the number of registered merchants of Point Reward Project for Consumers using Cashless Payment started on October 2019 amounted 950,000, and subjected gross billing paid by credit cards climbed to 1.4 trillion yen in two months. The use of cashless payments is steadily progressing.

In the credit card industry, which is our main business domain, business deals related to capital investment projects keep its stability and our favorable business environment continues.

In the first half of the FY06/2020, the company recorded net sales of 4,967 million yen (1.4% decrease YoY), operating income of 368 million yen (37.1% increase YoY), ordinary income of 360 million yen (27.8% increase YoY) and net income of 237 million yen (15.8% increase YoY). Although net sales recorded slightly below 5,000 million yen of the initial forecast, our business generally has progressed as the initial planned. Despite SG & A expenses increased from the previous year due to the labor costs increase, operating income recorded 368 million yen to the initial forecast of 360 million yen.

In the Financial Systems Solutions business segment, software development works has been processed securely and earned operating income as initially projected. For the cloud service business, its profitability has been improving from the previous fiscal year by the growth of the sales.

Orders received for this segment surpassed the result of the last first quarter for FY06/2020 contributed by the orders received for the cloud services launched for new customers. Orders for software development business increased steadily as well and we have no sign of the business environment change.

#### **(Financial Systems Solutions Business)**

In this business segment, the company recorded net sales by jobs consisted of the software development, maintenance service and sales of in-house developed package software and hardware for our customers, mainly credit card companies. The segment achieved the net sales of 4,527 million yen, (1.9% decrease YoY) and operating income of 493 million yen, (55.6% increase YoY).

In the first half of the FY06/2020, the company recorded the sales from the FEP (Front End Processing) system development project for new customer, the investment project related to BCP (Business Continuity Plan) of the customer, and other projects, both sales of software development business and hardware sales business declined from the same period of the previous fiscal year. As a result, net sales of this half of the FY06/2020 ended slightly below 4,614 million yen for the same period of the previous fiscal year. The sales of cloud service business grew from the same period of the previous fiscal year. The launch of both cloud services, IOASIS (i-oasis) providing the merchant-acquiring business operations, and IFLDS (i-finds) providing fraud-detection operations for credit card transactions, have contributed to the sales growth.

Software development works has been processed securely and we have had no unprofitable development project in the first half. For the cloud service business, the profitability has been improving from the previous fiscal year by the growth of the sales. This business segment recorded 493 million yen for operating income exceeded the result of the same period of the previous fiscal year.

The size of the development project of the segment is varied each order.

There is a possibility which the development cost over the initial estimate incur in each phase of the development works. Gross margin of each development project is not fixed and flat and that causes the fluctuation of the profit for the segment. Additionally, hardware such as servers is sold for the system development and system renewal projects and the net sales of hardware is varied by the designs and details of those projects. The variety of the profit from the sales of hardware also causes the fluctuation of the profit for the segment.

#### (Product Solutions Business)

By the sale of CWAT, in-house developed product preventing from information leakage inside the enterprise, and the sale of cyber-security products from third-parties, the company recorded net sales of 440 million yen (3.6% increase YoY) and operating loss of 125 million yen (48 million yen in the previous fiscal year) in this business segment.

The net sales surpassed compared with the result of the previous fiscal year though, the operating income fell below as due to the reduction of the sales of the product higher-margin.

### (2) Report of Financial Position

#### (Assets)

The balance of assets at the end of the first half of the current fiscal year decreased by 217 million yen from the end of the previous fiscal year to 9,814 million yen. Current assets decreased by 464 million yen from the end of the previous fiscal year to 5,589 million yen. This was mainly due to the increase of 206 million yen in inventories and the decrease of 756 in cash and deposits. Non-current assets increased 246 million yen from the end of the previous fiscal year to 4,224 million yen. This was mainly due to the increase of 245 million yen in investment securities.

#### (Liabilities)

The balance of liabilities at the end of the first half of the current fiscal year decreased by 388 million yen from the end of the previous fiscal year to 3,271 million yen. This was mainly due to the increase of 112 million yen in notes and accounts payable, the decrease of 273 million yen in income tax payable and the decrease 46 million yen in provision for bonuses.

#### (Net Assets)

Net assets at the end of the first half of the fiscal year increased 170 million yen from the end of the previous fiscal year to 6,542 million yen. This was mainly due to the increase of 169 million yen in valuation difference on available-for-sale securities.

#### (Report of Cash Flows)

The balance of cash and deposits at the end of first half of the current fiscal year was ended 2,498 million yen (2,390 million yen at the end of the previous fiscal year).

#### (Cash flows from operating activities)

Net cash provided by operating activities in the first half of the current fiscal year amounted to 38 million yen (net cash used in the previous fiscal year was 4 million yen). This was mainly attributable to the fact that income before taxes amounted 360 million yen and inventories increased 206 million yen by the cost of system development works in progress, trade payable increased 100 million yen by the accounts payable of outsourcing expenses.

#### (Cash flows from investing activities)

Net cash used in investing activities in the first half of the current fiscal year was 405 million yen (compared with 244 million yen used in the previous fiscal year). This was mainly due to the purchase of intangible fixed assets by the development works of the software for sales purposes and the internal use by 295 million yen, and the purchase of the equipment such as servers for our cloud service business by 119 million yen.

#### (Cash flows from financing activities)

Net cash used in financing activities in the first half of the current fiscal year was 389 million yen (200 million yen used in the previous fiscal year).

This was mainly due to cash dividends paid of 235 million yen and the purchase of treasury stocks of 136 million yen.

(3) Statement for the Future Forecast such as Business Forecast

There is no revision to the business forecast announced on August 7, 2019, "Summary of Non-consolidated Financial Results for the Fiscal Year Ended June 2019".
