Notice Concerning Construction of a New Plant by Consolidated Subsidiary

Yoshimura Food Holdings K.K. (the “Company”) hereby announces that, at a meeting of its Board of Directors held today, it resolved that Daishow Co., Ltd. (“Daishow”), a consolidated subsidiary of the Company, will construct a new plant. Details are as described below.

1. Background and Purpose

Since its founding in 1965, Daishow has built its business on peanut roasting and processing technology, manufacturing and selling peanut butter and other processed peanut products. Its mainstay product, “Peanut Butter Creamy,” is characterized by a light, fluffy texture that can be spread directly onto untoasted bread, and this distinctive feature has enabled Daishow to secure a high share of a niche market.

Since joining the Company Group in 2014, Daishow has continued to increase its net sales and maintain a high profit margin, supported by shared access to the Group's sales channels and support for new product development. In addition to its mainstay product, demand for private-brand products and products for commercial use has also been expanding. Amid such strong sales, however, the production capacity of Daishow's existing plant is approaching its limit, and Daishow has been unable to fully respond to requests for new private-brand and other new product development.

In light of this situation, in May 2024 Daishow acquired approximately 4,225 m^2 of land for a new plant within the Tamagawa Industrial Park in Tokigawa-machi, Hiki-gun, Saitama Prefecture, and has since been considering the construction of a new plant. The Company will now build the new plant to expand production capacity and will also introduce labor-saving equipment to improve production efficiency and quality standards. This will allow Daishow to capture order opportunities it currently cannot accommodate, thereby expanding sales and further improving business performance. At the same time, Daishow will utilize its existing plant as a base for multi-item products and new product development, strengthening its ability to respond to growth areas.

2. Overview of the Consolidated Subsidiary

(1)	Name	Daishow Co., Ltd.
(2)	Location	51 Tamagawa, Tokigawa-machi, Hiki-gun, Saitama Prefecture
(3)	Title and name of representative	Takayoshi Ogawa, Representative Director
(4)	Description of business	Manufacture and sale of processed peanut products
(5)	Share capital	9 million yen
(6)	Date of establishment	December 2013 (founded June 1965)
(7)	Fiscal year-end	End of February
(8)	Major shareholder and shareholding ratio	The Company: 100%

3. Overview of the New Plant

Planned construction site	Tokigawa-machi, Hiki-gun, Saitama Prefecture (within the Tamagawa Industrial Park)
Site area	Approx. 4,225 m^2
Investment amount	¥1.5 billion to ¥1.6 billion (including land acquisition, construction work, manufacturing equipment, etc.)
Method of financing	Own funds and borrowings from financial institutions

4. Schedule

Construction start: February 2028 (planned)

Completion: February 2029 (planned)

Commencement of operations: April 2029 (planned)

5. Future Outlook

As a result of the new plant, Daishow expects to improve the production capacity and productivity of its mainstay product, while also strengthening its business foundation for multi-item products and new product development through the utilization of its existing plant, thereby supporting Daishow's sustained growth and a further improvement in its market competitiveness.

Should any matters arise in the future that would have a material impact on business results, the Company will promptly make an announcement.
