"ParallelPlastics", Takashimaya, and John Masters Organics!
Launching the "100% Recycled Plastic Comb,"
jointly developed using collected empty cosmetic containers!
~Limited sales volume from Wednesday, October 1, 2025 at some
Takashimaya stores and EC~**

Hamee Corp. (Head Office: Odawara City, Kanagawa Prefecture, President and CEO: Ikuhiro Mizushima, Securities Code 3134: TSE Standard Market) announces ParallelPlastics, a plastic up-cycle service, will begin a collaboration with Takashimaya Co., Ltd.'s "Depart de Loop Cosmetics Recycling Project" and the John Masters Organics Group.

As a first step, we've jointly developed an "upcycled comb" made from 100% recycled plastic, using empty cosmetic containers collected from Takashimaya customers and John Masters Organics.

It will be released for limited quantity on Wednesday, October 1, 2025, at some stores and EC, including John Masters Organics in Takashimaya.

■ Background of ParallelPlastics's collaboration with Takashimaya's "Depart de Loop Cosmetics Recycling Project"

"ParallelPlastics" has transformed a wide range of unwanted plastic products, mainly discontinued smartphone cases, into new, "usable products."

On the other hand, the Takashimaya's "Depart de Loop Cosmetics Recycling Project" has transformed unnecessary "makeup products" and "empty cosmetic containers" made of plastic materials into crayons and candles.

With the 2024 meeting at an eco-related exhibition, we began working toward collaboration. Approximately one year has passed since we launched the "upcycled comb" with 100% recycled plastics, including product design that draws out the attractiveness of materials, and design with an eye to safety, hygiene, and regeneration.

John Masters Organics was invited to this project for two main reasons. Firstly, we have been empathizing with the brand's philosophy of "making people and the earth beautiful." Secondly, as a leading hair care brand, we see a strong affinity between them and the customers of Takashimaya. The brand's commitment to both sustainability and high quality aligned perfectly with ParallelPlastics' upcycling technology and Takashimaya's vision for a circular production model. This synergy of the three parties' strengths led to the realization of this collaboration.

■ **Jointly developed Corm with 100% recycled plastic to make used cosmetic containers a valuable product!**

Collect empty cosmetics containers, and Takashimaya buyers sort and wash their own colors and types. Containers were subsequently upgraded by "ParallelPlastics" recycling process (milling and molding).

In the case of composite plastics, where more than two types of plastics are used, the effect is to create a marble pattern because of the different melting temperature of each.

In addition, about 10% of the "colors" derived from empty cosmetic containers are mixed, and the remaining 90% use recycled materials for housing parts that were scheduled to be discontinued and discarded.

This comb is also recommended for in-bus use, for example, by making hair treatments conform to our hair.

We offer a total of four types of color.

■ Product Information

- Product name : 〈John Masters Organics〉 Depart de Loop upcycled comb
(All 4 colors) *Takashimaya only
- Price : JPY3,520 each (tax included)
- Release date : From Wednesday, October 1, 2025

Iyotetsu [Green Cosmetic Garden],
Takashimaya Cosmetics Site [TBEAUT]
- Sales companies : John Masters Organics Group, Inc.
- Special Remarks : Limited Quantity
The content is subject to change without prior notice.

■ Comments from the person in charge

○Buyers of Takashimaya: Yusuke Hashi, Hikari Okada

"Recycling is a great way to meet people. It would be great if this cute comb could give you a little insight into circulation."

○Director of John Masters Organics: Masakatsu Kato

"This project resonates with John Masters Organics' original desire, 'making people and the earth beautiful.' Every comb has different facial expressions, and it has a special feeling that the same thing does not exist. I would recommend this as a gift."

○Director of "ParallelPlastics": Takuya Miyaguchi

"I wanted to try cosmetic bottles because of their beautiful colors. Marble, which is produced by the temperature difference between composite materials, seems to be something that can only be found through regeneration. I want to expand the cycle from 'fun' rather than obligation."

■ About the "Depart de Loop Cosmetics Recycling Project"

The "Cosmetics Recycling Project" is not limited to products purchased at Takashimaya, but is an initiative to collect, recycle, and commercialize empty containers for make-up goods and cosmetics that have finished serving customers and business partners. Collected make-up goods and empty containers are recycled and used as "crayons," "candles," "papers," and "haircoms" through recycling partners.

■ About "ParallelPlastics"

"ParallelPlastics" is an up-cycle service that breathes new lives into plastics that have lost their field, such as warehousing inventories, manufacturing scraps, and used resins. We support the creation of products that combine sustainability, design, and mass production while leveraging the individuality of materials, and propose the coexistence of "waste plastic × affluence of life."
