Hamee Corp. (Head Office: Odawara City, Kanagawa Prefecture, President and CEO: Ikuhiro Mizushima, Securities Code 3134: TSE Standard Market) announces Parallel Plastics, an upcycling support service for waste plastic, launched "Material Library," an online material archive, on its official website on May 12, 2026. A sample book for comparing materials from our past co-creations, categorized by color and raw material. We aim to be the go-to platform that empowers brands and manufacturers to take their first step toward utilizing waste plastics.

■ "Beauty in the Unsorted" — A Reverse Paradigm: Turning the Cost of Waste into Wealth.

When different types of plastic waste are melted together, their distinct compositions create unique, marbled patterns. One of a kind, every time. These materials emerge with the raw, irregular textures of natural stone. From concept planning to product design, Parallel Plastics provides end-to-end solutions.

■ Co-creation Case Study: Transforming Plastic Waste into New Products.

Our co-creation journey spans multiple fields, from childcare and cosmetics to major department stores. (Awarded the 2025 Good Design Award.)

Case Study 1 (Childcare Manufacturer): Repurposing unused plastic from baby bottle production into medal-shaped photo frames.

Case Study 2 (Department Store / Cosmetics Brand): Reincarnating in-store collected cosmetic containers into premium cosmetic combs.

The "Material Library" is a web-based archive showcasing our co-created materials, sortable by color and origin. Our library is the first point of contact for brands looking to give new life to plastic. Explore our diverse material options and envision your next project before we begin our co-creation journey together.

The name "Parallel" reflects our vision of carving out an alternative path—one that runs parallel to conventional recycling, which relies on strict sorting and virgin materials. The Material Library is also a platform that visualizes this 'alternative path' through a diverse archive of materials.

We will update the Material Library with every new co-creation, documenting our journey of turning waste into one-of-a-kind materials.

○ Key Features of "Material Library"

- A web-based archive that allows for cross-searching of recycled plastic materials by color and raw material source.
- Compare 'before and after': Track the evolution from discarded plastic to high-quality material.
- We will operate this library as a gateway to our materials, supporting the 'first step' for potential co-creation partners.

■ About "Parallel Plastics"

"Parallel Plastics" is a service that breathes new life into obsolete inventory and production scraps. By preserving the original characteristics of these materials, we transform them into high-value products through fresh perspectives and design. Born from a challenge to address Hamee's own inventory waste, the project has evolved through co-creation with companies across diverse industries, ultimately winning the 2025 Good Design Award.

■ Outline of Hamee Corp.

Company : Hamee Corp. (TSE Standard Market, Securities Code: 3134)

Incorporation : May, 1998

Representative : Ikuhiro Mizushima President and CEO

Address : Square O2, 2-12-10, Sakae-cho, Odawara City, Kanagawa Prefecture
