# Turning stranded plastic into 100% recycled products. Hamee's 'Parallel Plastics' Wins Special Award at the Odawara-Hakone Climate Change Awards.

---

Hamee Corp. (Head Office: Odawara City, Kanagawa Prefecture, President and CEO: Ikuhiro Mizushima, Securities Code: 3134, TSE Standard Market) announces that its plastic upcycling service "Parallel Plastics" has received the Special Award at the 5th Odawara-Hakone Climate Change Awards, organized by the Odawara-Hakone Chamber of Commerce and Industry (Chairman: Teisuke Suzuki). The Special Award is presented to the top three businesses following the Grand Prize. The award was presented at the chamber's member commendation ceremony held on Thursday, November 12, 2026. This award follows the Good Design Award 2025 received by Parallel Plastics.

Award Name: The 5th Odawara-Hakone Climate Change Awards

Recognition: Special Award (Presented to the top three businesses following the Grand Prize)

Organizer: Odawara-Hakone Chamber of Commerce and Industry

Date of Ceremony: Thursday, November 12, 2026

■ About the Award-Winning Initiatives

With the revised Act on the Promotion of Effective Utilization of Resources, which took effect in April 2026, manufacturers are increasingly required to report their plans and actual performance regarding recycled material usage.

Parallel Plastics submitted the following three initiatives for the award:

・Material Provenance Certificate That Traces the Material's Origin

Since July 2026, every shipment is accompanied by a certificate that traces the material using actual records—from origin, purchasing, and crushing to molding and final production. (This certificate is issued independently by Parallel Plastics and does not constitute third-party certification.) Press Release: Launch of the Material Provenance Certificate (July 2026)

・Manufacturing Products Made from 100% Recycled Materials

We eliminate processes such as sorting, washing, and pelletizing, and add no new plastic. The natural stone-like patterns created by blending different types of plastics are integrated directly into the product design.

・Operations at the Odawara Headquarters and Collaboration with Equipment Manufacturers

The business is operated from our Odawara headquarters, while products are molded at manufacturing partners' facilities using our own proprietary molds. In July 2024, we formed a capital and business partnership with a Japanese company developing equipment to recycle mixed plastics.

■ Track Record to Date

Since its launch in May 2023, Parallel Plastics has been collaborating with manufacturers and retailers for over three years. The brand received the Good Design Award 2025, and cumulative production has reached 10,000 units or more as of November 2026.

Products made by Parallel Plastics use plastic from companies as raw material. The patterns formed by the blended plastics differ from piece to piece.

■ Comment from Takuya Miyaguchi, Director of Parallel Plastics at Hamee Corp.

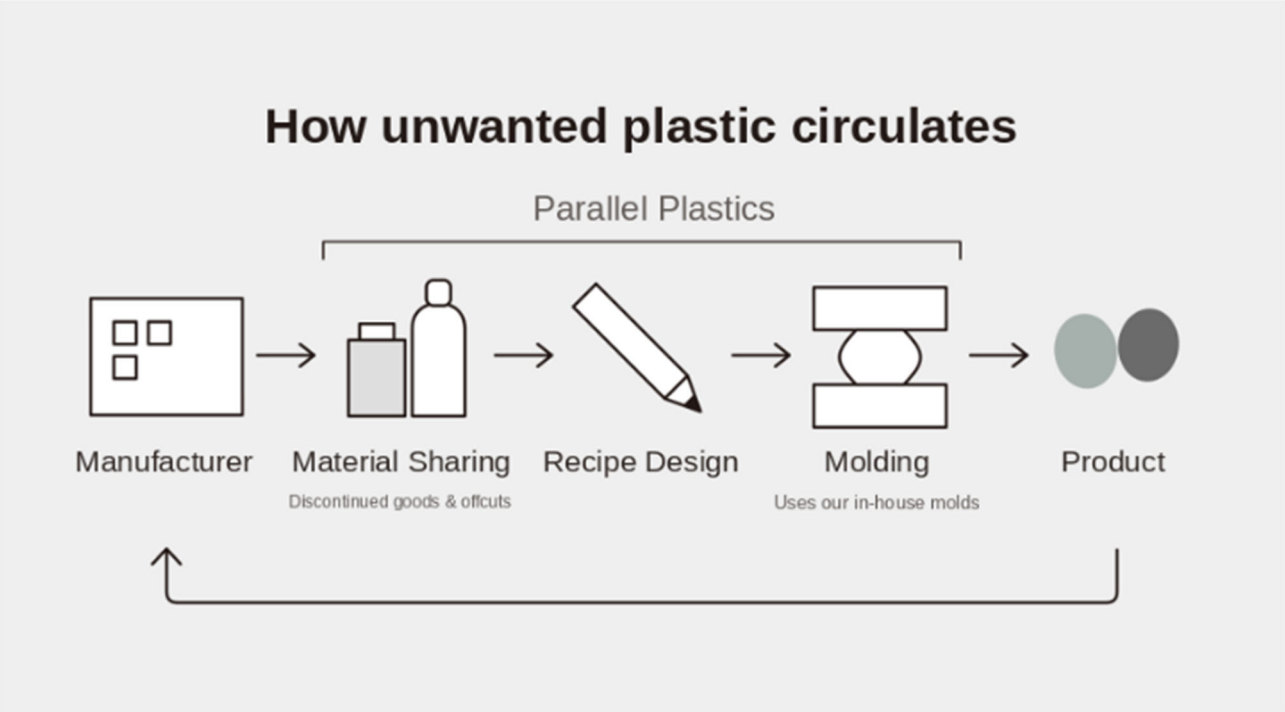

The plastic generated at manufacturing sites carries each manufacturer's distinctive colors, materials, and dedication. We have carried that very identity forward into the next products we make. Encouraged by this recognition, we will continue collaborating with like-minded companies and manufacturing partners to turn stranded plastic into products people will cherish for years to come.

■ About the Odawara-Hakone Climate Change Awards

The Odawara-Hakone Climate Change Awards is an award program organized by the Odawara-Hakone Chamber of Commerce and Industry. The program honors companies and organizations that have made outstanding contributions to climate change mitigation and environmental conservation in the Odawara-Hakone region, with the goal of raising awareness among residents and businesses to expand eco-friendly initiatives. The program features three award categories: the Grand Prize, the Special Award, and the Incentive Award.

■ About Parallel Plastics

"No More Discarding Plastics" — Parallel Plastics is an upcycling service that transforms unwanted plastics of varying compositions into new products through a melting and blending process. It eliminates processes such as sorting, washing, and pelletizing, and adds no virgin materials. Launched in May 2023 as an alternative pathway alongside traditional recycling, which relies on sorting and virgin materials. Recipient of the Good Design Award 2025 and the Special Award at the 5th Odawara-Hakone Climate Change Awards.
