Kudan Partners with Industry Leader to Advance AI-Powered Digital Twin Solutions

Kudan Inc. (headquartered in Tokyo, Japan; CEO Daiu Ko) is pleased to announce a strategic partnership with a global provider of diversified industrial services. This collaboration harnesses advanced AI-driven digitization and photorealistic 3D modeling to transform Digital Twin solutions, driving greater efficiency, compliance, and strategic planning across multiple industries, including manufacturing, logistics, energy and utilities, life sciences, and pharmaceuticals.

1. Overview of Partnership

By combining Kudan’s artificial intelligence technology with the partner company’s expertise in industrial digitalization, the partnership aims to deliver an end-to-end Digital Twin solution. This initiative will enhance operational workflows, improve data accuracy, and provide a robust foundation for long-term digital transformation strategies across a diverse range of industries.

Following a series of successful pilot projects, the collaboration has already demonstrated measurable improvements in digital asset recording accuracy, process automation, and integration capabilities. The adoption of photorealistic 3D digital twins and AI-powered systems streamlining the identification and categorization of infrastructure significantly reduces manual intervention, optimizes data processing, and enhances decision-making through an intelligent, data-driven approach.

Key Technological Advancements:

- **Photorealistic 3D Modeling:** Enables highly accurate visualization of assets, facilitating streamlined management, assessment, and decision-making.
- **AI-driven Categorization Technology:** Systematically processes and structures asset-related information, reducing inefficiencies and optimizing digital workflows.
- **Seamless Data Integration:** Ensures smooth compatibility with existing enterprise Digital Twin platforms, enhancing accessibility, usability, and cross-system interoperability.

This partnership highlights the increasing strategic importance of digital transformation in asset-intensive industries. By systematically digitizing assets, organizations can achieve substantial operational cost savings, extend asset lifecycles, and enhance overall efficiency in both industrial and enterprise environments.

"This collaboration marks a major milestone in the integration of AI and Digital Twin technology," said Daiu Ko, CEO of Kudan. "By leveraging the latest advancements in AI and 3D visualization, we are redefining how industrial assets and environments are captured, analyzed, and optimized."

A representative from the partner company added, "We are excited to implement these cutting-edge solutions, which will unlock new efficiencies, boost productivity, and provide our clients with state-of-the-art tools for managing and optimizing their assets."

Both organizations look forward to a long-term partnership aimed at advancing operational efficiency and driving innovation across multiple industries.

2. Overview of the Partner Company

Aside from jointly conducting demonstration experiments with the customer, there are no capital, personnel, or related-party relationships between two companies. At the request of the company, further details have not been disclosed due to competitive strategic considerations.

3. Schedule

Date of partnership agreement: March 12, 2025

Expected start date of partnership: March 12, 2025

4. Future Outlook

We estimate that this release will only have a minor impact on the company's financial performance for the fiscal year ending 31 March 2025 at this time. As the company's financial performance will be affected by the future solution sales, we will promptly make an announcement if any event arises that is expected to have a significant impact on the company's financial performance such as increased customer orders.

About Kudan

Kudan is a leading provider of Artificial Perception and Artificial Intelligence technologies, enabling next-generation solutions in mobile mapping, digital twins, robotics, and autonomous driving. With its innovative visual navigation, perception and spatial intelligence technologies, Kudan is at the forefront of digital transformation, empowering businesses to bridge the physical and digital worlds seamlessly, and ensuring scalable deployments of autonomous machines in dynamic environments with great accuracy and reliability.
