Current dividend	¥25.00	—	—
Previous dividend (Fiscal year ended March 31, 2024)	¥25.00	¥25.00	¥50.00

2. Reason for revision of dividend forecast

The Group recognizes the return of earnings to shareholders as a management issue of vital importance. As such, the Group strives to secure a robust management base, stable revenues and improved return on equity, supporting a basic policy of continuing appropriate distribution of earnings backed by solid business results. In the current Mid-term Management Plan (covering the period from the fiscal year ended March 31, 2023 to the fiscal year ending March 31, 2025), the Group aims to achieve a total return ratio of 50–60%, combining dividends and acquisitions of treasury shares.

In view of the current favorable trend in business results, the Group is committed to returning still further earnings to shareholders. To this end, the Group has revised its forecast of the year-end dividend for the fiscal year ending March 31, 2025, from the previous forecast of ¥30 per share (including a commemorative dividend of ¥5 per share) to ¥42 per share, marking an upward revision of ¥12 per share. With the current revision, the forecast of total dividend per share for the fiscal year ending March 31, 2025, including the interim dividend of ¥25 per share, rises from ¥55 per share to ¥67 per share, marking an increase of ¥17 per share from the dividend of ¥50 per share distributed in the previous fiscal year (ended March 31, 2024).

The Group will continue its efforts to strengthen measures to return earnings to shareholders in accordance with business growth..
