## Qualitative Information Related to Financial Statements for the Quarter under Review

### (1) Explanation Concerning Operating Results

Based on its corporate philosophy, "aiming to become a corporate group full of venture spirit," the Group has established a management policy of strengthening coordination among the business companies of the Group through the enhancement of headquarters functions and accelerating profit growth through the reduction of indirect costs on a Group-wide basis.

As a key measure for the current fiscal year, the Group has been accelerating the business development of Group companies by focusing investment in growth areas. It aims to strengthen business collaboration among Group companies in procurement, manufacturing, product planning and other fields.

In the first three months of the consolidated fiscal year under review, net sales declined 0.6% year on year, to 13,822 million yen, mainly reflecting sluggish growth in IPC (Industrial PC)-related and MECT (Mechatronics)-related products under the IA (Industrial Automation) Business, offsetting steady growth of SS (Sensing Solution) Business. On the profit side, operating profit was 1,751 million yen, down 17.4% year on year, mainly due to an increase in selling, general and administrative expenses, which reflected the effects of enhanced marketing and sales promotion activities in response to the relaxation of movement restrictions in the COVID-19 pandemic, and the impact of foreign exchange. Ordinary profit stood at 1,753 million yen, down 27.9%, and profit attributable to owners of parent was 1,182 million yen, down 32.1%.

The business results for each segment are described below.

#### ① SS (Sensing Solution) Business

Net sales for the SS Business came to 6,119 million yen (up 8.2% year on year) and operating profit was 694 million yen (down 19.0% year on year).

Net sales for the security sensors were 4,163 million yen (up 9.3% year on year). Net sales in overseas operations exceeded the year-ago level, reflecting steady sales of outdoor sensors in Europe. On the other hand, net sales in domestic operations were slightly lower than the year-ago level, the result of sluggish sales to security companies caused by a shortage of components.

Net sales of automatic door sensors totaled 1,454 million yen, up 18.3% year on year. Domestic and overseas sales increased steadily, reflecting an appreciation of the Group's product supply system.

#### ② IA (Industrial Automation) Business

In the IA Business, net sales came to 7,448 million yen (down 6.6% year on year) and operating profit was 955 million yen (down 29.7% year on year).

Net sales for FA-related products amounted to 2,608 million yen, down 3.8% year on year, given sluggish sales of products for semiconductor and electronic components in Japan, more than offsetting strong sales of products for secondary battery industries in China.

Net sales for MVL (Machine Vision Lighting)-related products came to 3,501 million yen (up 2.6% year on year), reflecting steady domestic sales of products for automobiles as well as favorable overseas sales of products for the logistics industry.

Net sales for the IPC-related products amounted to 1,107 million yen (down 15.1% year on year). The posting of sales of products for industrial computers was carried over to the second and subsequent quarters, reflecting a delay in the manufacturing of products for semiconductor manufacturing equipment as a result of a shortage of components.

Net sales for MECT-related products came to 230 million yen (down 57.8% year on year), reflecting a backlog of secondary battery manufacturing equipment which is still in the manufacturing process.

### ③ EMS (Electronics Manufacturing Service) Business

In the EMS Business, sales to unaffiliated customers amounted to 128 million yen (down 27.8% year on year) due to stagnant growth in projects for the electronic contract manufacturing service. On the other hand, operating profit came to 239 million yen (compared to 2 million yen a year ago), mainly attributable to an increase in the production volume of products within the Group.

## (2) Explanation Concerning Financial Position

### (Assets)

Total assets amounted to 63,017 million yen at the end of the first three months under review, which was a decrease of 284 million yen from the end of the previous fiscal year.

Current assets stood at 47,796 million yen, which was a decline of 136 million yen. The decrease mainly reflected a decline in cash and deposits of 2,364 million yen, partly offset by increases in inventories of raw materials and supplies of 1,845 million yen and in other current assets of 319 million yen.

Non-current assets amounted to 15,221 million yen, which was a decrease of 148 million yen. The decrease mainly reflected declines in investments and other assets of 136 million yen and in customer-related assets and other intangible assets due to amortization of 27 million yen.

### (Liabilities)

Total liabilities stood at 22,368 million yen at the end of the first three months under review, which was a decrease of 1,198 million yen from the end of the previous fiscal year. This was primarily a result of decreases of 750 million yen in income taxes payable and other current liabilities and 447 million yen in long-term borrowings and other non-current liabilities.

### (Net assets)

Net assets amounted to 40,648 million yen at the end of the first quarter under review, which was an increase of 913 million yen from the end of the previous fiscal year. This resulted mainly from an increase of 543 million yen in retained earnings and a rise of 350 million yen in other comprehensive income, including foreign currency translation adjustment.

## (3) Management's discussion of consolidated operating results forecast and other forecasts

The consolidated results forecasts for the fiscal year ending December 31, 2023 remain the same as those stated on February 14, 2023.
