Smart Pickup Lockers installed in Tokyo Monorail Haneda Airport Terminal 3 Station to allow customers to pick up “GLOBAL WiFi®” without waiting in line at the counter

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota, hereinafter “Vision”), a provider of “GLOBAL WiFi®” (<https://townwifi.com/>), which is a reasonable and high-quality overseas Wi-Fi router rental service, has installed “Smart Pickup” lockers, which allow customers to pick up terminals without waiting in line at the counter, in Tokyo Monorail Haneda Airport Terminal 3 Station, effective August 7, to meet diverse needs. This is the first installation in a station.

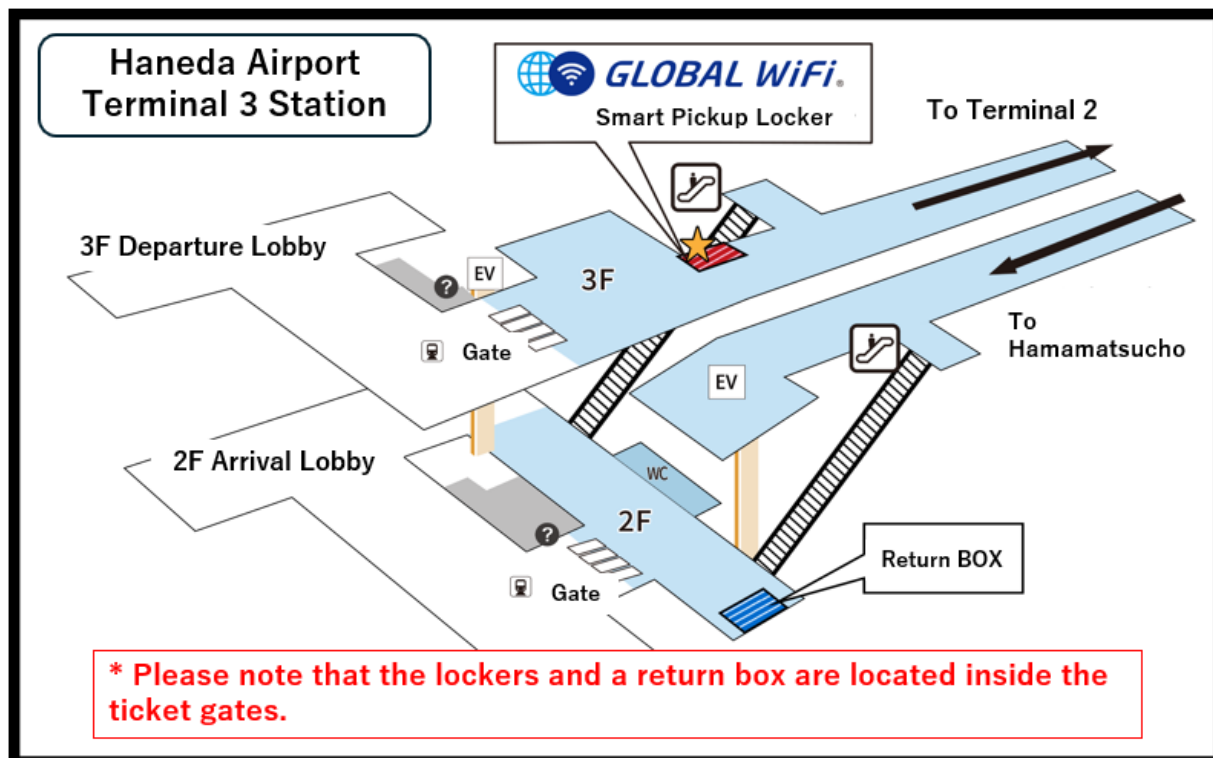

“Smart Pickup” is a service that allows customers to pick up a set of rental items by holding up the QR code issued when they make a reservation.

By installing the lockers in the station (on the departure floor of Haneda Airport), customers can directly go to the check-in counter of each airline without stopping at our counter after arriving at the station. In addition, a return box is also available in the station (on the arrival floor of Haneda Airport), so that customers can return their terminals on their way home by simply dropping them into the box. This is expected to reduce counter congestion and further improve convenience, as well as enable smooth pickup regardless of our counter’s

business hours.
