Vision Inc. has begun offering new device “X200” on “WiFi-rental.com®.”
- New model without lithium-ion battery for safety, perfect for in-vehicle use -

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota, hereinafter Vision) has begun offering the Wi-Fi router “X200,” a lithium-ion battery-free model, as a new addition to the lineup of its domestic Wi-Fi rental service “WiFi-rental.com®.”

Wi-Fi without a lithium-ion battery, specialized for in-vehicle use

The “X200” is designed for use while connected to a power source. By simply plugging in a Type-C charging cable, users can connect multiple devices, including PCs, smartphones, and tablets, to Wi-Fi and access the Internet.

Since it does not contain a lithium-ion battery, there is no risk of fire or swelling even in high-temperature environments, allowing safe and reliable use. It is designed especially for in-vehicle use, providing higher safety compared to lithium-ion battery-equipped models even during long trips or under direct sunlight.

In addition, it can be powered via a Type-C plug from a PC, smartphone, or other device, making it usable even in environments without an external power source.

■ “X200” feature

- Without a lithium-ion battery, it is lightweight and safe to use, with no risk of fire or swelling, even in high-temperature environments.

Communication Standard : 2.4GHz 802.11 b/g/n/ax

Dimensions : Approx. 82(W) x 30(H) x 12(D) mm

Weight : 34g

Going forward, we will continue to strive for various service improvements to provide our customers with more convenient and comfortable communication environments both domestically and internationally, through offerings centered on “WiFi-rental.com®” and “GLOBAL WiFi® (overseas Wi-Fi rental service).”
