“GLOBAL WiFi®” launches new 5G Unlimited Plan available in Indonesia.

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota), which operates GLOBAL WiFi Business, Information and Communications Service Business, and Glamping and Tourism Business under the themes of “Connecting People, Connecting the World,” has commenced offering a 5G Unlimited Plan available in Java and Bali, Indonesia as of February 3.

In Indonesia, where digitalization is accelerating alongside economic growth, 5G networks are expanding across major areas, including the capital city of Jakarta, the historic city of Yogyakarta, and the world-famous resort island of Bali. Locally, a wide range of cafes and workspaces equipped with Wi-Fi are widely available, and new travel styles that take advantage of the latest communication environments are increasingly established. In addition, Indonesia's relatively low cost of living is making it an increasingly popular destination, offering higher-value experiences even amidst the trend of a weaker yen.

In response to the evolution of local communications infrastructure and the growing demand for business and tourism travel, we have conducted extensive testing of the local network environments to ensure comfortable high-volume communications in Java and Bali. As a result, we have now launched a new 5G Unlimited Plan in these regions.

We will continue to improve our services and network quality and expand our coverage areas to provide a reliable communication environment around the world.

- **“GLOBAL WiFi®” Ultra-High-Speed 5G Unlimited Plan Service Area Expansion**
 - Launch : February 3, 2026

- Website : <https://townwifi.com/price/5g/>
- Areas covered : 55 countries and regions in total, including existing and newly added areas

(Newly added areas) Indonesia (Java / Bali)

(Existing service areas) Iceland / Ireland / Mainland U.S.A. / United Arab Emirates / U.K. / Italy / India / Egypt / Australia / Austria (Europe) / Oman / Netherlands / Canada / Cyprus / Greece / Guam / Croatia / Saudi Arabia / Singapore / Switzerland / Sweden / Spain / Slovenia / Thailand / Czech Republic / Germany / New Zealand / Bahrain / Hawaii / Hungary / Philippines / Finland / Brazil / France / Bulgaria / Vietnam / Peru / Belgium / Portugal / Macau / Malta / Malaysia / Mexico / Maldives / Mauritius / Latvia / Lithuania / Romania / Luxembourg / South Korea / Taiwan / China / Hong Kong / Republic of South Africa

Precautions :

- 5G coverage in Indonesia is available on the islands of Java and Bali. Please note that connection may revert to 4G depending on the local environment.
- In areas where 5G infrastructure is not yet established, such as Sumatra and Kalimantan, service will be provided via 4G. We appreciate your understanding.
- This Plan provides data communications even without an 5G connection by switching to 4G.
- 5G may be unavailable due to local circumstances; in such cases, 4G only is provided.
- Because the Plan uses the most up-to-date devices, customers can expect higher communication speeds compared to previous 4G devices, even when connecting via 4G.
- * Varies depending on location.
- If data volumes become excessive, connectivity may be restricted depending on the policies of partner carriers at the destination country or our own assessment.

• **About Vision's "communication quality" standards and "signal audits"**

Under "GLOBAL WiFi®," Vision provides global high-speed mobile communications based on information updates and verifications conducted in collaboration with partner communications carriers around the world. When adding coverage areas, communication methods, and plans, we always conduct meticulous on-site "signal audits."

After verifying the extent of the coverage area (signal area), including dead spots and locations where signals are blocked by buildings, etc., we measure actual communication speeds. Only if these measurements meet our own communication quality standards do we begin purchasing communications bandwidth.

The verification is undertaken by our own overseas staff and partner companies in some areas.

There are many 5G communications carriers around the world, but at Vision, we only begin providing service in areas that meet our quality standards.

■ Outline of the GLOBAL WiFi® service

- Service details : Mobile Wi-Fi router rental service for overseas use
- Rental fees : As low as JPY300 per day
- Service area : More than 200 countries and regions worldwide
- Application methods : Website (<https://townwifi.com>), airport service counters, telephone call
