“GLOBAL WiFi®” launches suitcase repair and wrapping service at Sendai Airport to assist customers’ needs at airport counters.

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota), which operates GLOBAL WiFi Business, Information and Communications Service Business, and Glamping and Tourism Business under the themes of “Connecting People, Connecting the World,” has opened a multi-service counter at Sendai Airport to assist travelers with their needs.

This counter accepts applications for an overseas Wi-Fi rental service “GLOBAL WiFi®” and a Wi-Fi rental service for visitors to Japan “NINJA WiFi®,” as well as providing suitcase repair and wrapping services.

■ Main services provided at the Sendai Airport counter

- Wi-Fi router rental service for overseas / for visitors to Japan

We offer application and rental services at the counter for an overseas Wi-Fi router rental service “GLOBAL WiFi®” and a Wi-Fi router rental service for visitors to Japan “NINJA WiFi®.”

This counter is only available for rentals to customers who apply on the day. Pre-reserved order items will continue to be collected via the “Smart Pickup” lockers located within the airport, enabling pickup in as little as 10 seconds through QR code (*1) authentication.

[The following is the first initiative for a “GOBAL WiFi®” airport counter]

• Suitcase repair service

The suitcase repair service targets issues with casters (wheels), which commonly occur before and after travel. Repairs are accepted at our counter, with the condition checked prior to providing services.

We primarily replace caster components using compatible parts to address issues such as poor rolling performance or damage caused by looseness.

【Operation flow and Estimated time required】

Item condition assessment → Quote & Feasibility → Consent → Repair → Functional check → Return

Estimated time required : As little as 10 minutes

When the wheels on a suitcase malfunction, transporting luggage during travel becomes difficult, which can negatively impact on the overall travel experience.

• Suitcase wrapping service

The suitcase wrapping service uses a specialized stretch film to fully wrap the suitcase, preventing damage, soiling, and unauthorized opening during transportation.

This service is primarily aimed at travelers going overseas and is designed to provide added peace of mind when checking in luggage, offering value unique to the airport environment.

These two services were launched in response to the needs and concerns related to suitcase damage and soiling that we have frequently heard from customers at the airport counters we operate. The initiative aims to reduce travelers' anxiety and inconvenience before and after their trips, reduce stress during travel, and create an environment that enables safer and more comfortable trips.

Going forward, we will continue to expand our services and enhance convenience, positioning our airport counters not merely as Wi-Fi pickup locations but as touchpoints that address customers' "needs" before and after travel.
