**“GLOBAL WiFi®” expands 4G Unlimited Plan coverage to 134 countries and regions  
and also begins offering 5G Unlimited Plan in Japan.**

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota), which operates GLOBAL WiFi Business, Information and Communications Service Business, and Glamping and Tourism Business under the themes of “Connecting People, Connecting the World,” has expanded its coverage area of “Unlimited Plan” to 134 countries and regions, with no limit on daily data allowance for “GLOBAL WiFi®,” an overseas-use Wi-Fi router rental service. In addition, we have begun offering a 5G Unlimited Plan in Japan, making it available in 56 countries and regions.

Currently, the growing popularity of video-based social media, the expansion of AI services, and the widespread adoption of IoT devices are driving increased global data consumption. Against this background, a “high-speed and unlimited” internet environment has become essential infrastructure that significantly impacts the comfort of travelers during overseas trips.

As of February 12, Ethiopia, Namibia, Zimbabwe, Botswana, Belize, and Svalbard (Norway) have been newly added to the lineup, upgrading service from 3G-only coverage to 4G unlimited availability. In these areas, all 4G plans are now available, including the Unlimited Plan and the 1.1GB per day plans. In addition, we have launched a 5G Unlimited Plan for domestic use in Japan.

We will continue striving to enhance convenience for customers traveling around the world by providing a more comfortable internet environment and continuously improving our services.

■ New plan overview

- Launch : February 12, 2026
- Price : <https://townwifi.com/price/>

○ 4G (high-speed) area covered : Belize / Botswana / Ethiopia / Namibia / Svalbard (Norway) / Zimbabwe  
(\* Listed in alphabetical order.)

○ 5G (ultra-high-speed) area covered : Japan

○ About the Unlimited Plan :

Since it is intended to provide better quality communications as a service that can be used more comfortably, there may be a change in the coverage area or the service charge in the future.

Precautions on the Unlimited Plan :

- Regarding 5G plans, if a 5G connection is unavailable, the service will automatically switch to 4G. Depending on the local network coverage, connections may be limited to 4G only. In such cases, since we provide the most up-to-date devices, customers can expect higher communication speeds compared to previous 4G devices, even when connecting via 4G. \* Varies depending on location.

- If data volumes become excessive, connectivity may be restricted depending on the policies of partner carriers at the destination country or our own assessment.

#### • About Vision's "communication quality" standards and "signal audits"

Under "GLOBAL WiFi®," Vision provides global high-speed mobile communications based on information updates and verifications conducted in collaboration with partner communications carriers around the world. When adding coverage areas, communication methods, and plans, we always conduct meticulous on-site "signal audits."

After verifying the extent of the coverage area (signal area), including dead spots and locations where signals are blocked by buildings, etc., we measure actual communication speeds. Only if these measurements meet our own communication quality standards do we begin purchasing communications bandwidth.

The verification is undertaken by our own overseas staff and partner companies in some areas.

There are many 5G communications carriers around the world, but at Vision, we only begin providing service in areas that meet our quality standards.

### ■ Outline of the GLOBAL WiFi® service

○ Service details : Mobile Wi-Fi router rental service for overseas use

○ Rental fees : As low as JPY300 per day

○ Service area : More than 200 countries and regions worldwide

○ Application methods : Website ( <https://townwifi.com> ), airport service counters, telephone call
