**“GLOBAL WiFi®” expands 4G Unlimited Plan coverage to 139 countries and regions,
adding 4 new areas such as Palau and Côte d’Ivoire.**

Vision Inc. (Headquarters: Shinjuku-ku, Tokyo; President, Representative Director and COO: Kenji Ota), which operates GLOBAL WiFi Business, Information and Communications Service Business, and Glamping and Tourism Business under the themes of “Connecting People, Connecting the World,” has expanded its coverage area of “4G Unlimited Plan” to 139 countries and regions, with no limit on daily data allowance for “GLOBAL WiFi®,” an overseas-use Wi-Fi router rental service.

The advertisement features a blue background with a white central box. At the top, the GLOBAL WiFi logo is displayed. Below it, the text "4G Unlimited Plan" is written in large red letters. Underneath, "Now Available in" is written in blue, followed by "Four New Countries and Regions!" in red. A yellow speech bubble with the word "NEW" is positioned to the left of the first two regions. The regions listed are: Republic of Palau (with its flag), Côte d'Ivoire (with its flag), British Virgin Islands (with its flag), and Bermuda (with its flag).

This time, we have added the British Virgin Islands, Bermuda, Côte d’Ivoire, and the Republic of Palau to the 4G Unlimited Plan by “GLOBAL WiFi®.”

Notably, the Republic of Palau is also being introduced as a new service area for “GLOBAL WiFi®” for the first time. The Republic of Palau, a nature-rich island nation consisting of numerous islands of various sizes and known for its close ties with Japan, is home to a World Heritage-listed marine area inhabited by some 1,400 species of fish and more than 500 species of coral. It is also renowned as a resort destination and a dream location for divers. Following the launch of direct flights from Narita Airport in 2025, Palau is now even more accessible, with no time difference from Japan and a flight time of approximately five hours.

In addition, the following three countries and regions, which previously supported only 3G connectivity, are now upgraded to the 4G Unlimited Plan.

- British Virgin Islands

A popular Caribbean resort destination, renowned for its emerald-green waters and beautiful white-sand beaches.

- Bermuda

Famous for the legendary “Bermuda Triangle,” this region offers a unique history and breathtaking scenery.

- Côte d’Ivoire

Home to one of West Africa’s leading economic hubs, Côte d’Ivoire has seen remarkable economic growth in recent years, driving expectations for increased business travel. The 4G Unlimited Plan provides a seamless internet connection, even when heavy data usage is required.

With this expansion, the 4G Unlimited Plan is now available in 139 countries and regions. In popular destinations worldwide that attract numerous tourists and business travelers as premier resorts and economic hubs, demand is rising for secure, high-speed, and high-capacity internet connectivity. To address these evolving needs, we will continue to expand the coverage of our 4G Unlimited Plan, providing customers with a seamless, worry-free online experience wherever they go.

- **“GLOBAL WiFi®” 4G Unlimited Plan Service Area Expansion**

- Launch : August 27, 2026

- Website : <https://townwifi.com/price/>

- Area covered : 139 countries and regions in total, including existing and newly added areas

(Newly added areas) British Virgin Islands / Bermuda / Côte d’Ivoire / Republic of Palau

(*Listed in alphabetical order.)

- About the Unlimited Plan :

Since it is intended to provide better quality communications as a service that can be used more comfortably, there may be a change in the coverage area or the service charge in the future.

Precautions :

- Because the Plan uses the most up-to-date devices, customers can expect higher communication speeds compared to previous 4G devices, even when connecting via 4G.

- * Varies depending on location.

- If data volumes become excessive, connectivity may be restricted depending on the policies of partner carriers at the destination country or our own assessment.

- **About Vision’s “communication quality” standards and “signal audits”**

Under “GLOBAL WiFi®,” Vision provides global high-speed mobile communications based on information updates and verifications conducted in collaboration with partner communications carriers around the world. When adding coverage areas, communication methods, and plans, we always conduct meticulous on-site “signal audits.”

After verifying the extent of the coverage area (signal area), including dead spots and locations where signals are blocked by buildings, etc., we measure actual communication speeds. Only if these measurements meet our own communication quality standards do we begin purchasing communications bandwidth.

The verification is undertaken by our own overseas staff and partner companies in some areas.

There are many 5G communications carriers around the world, but at Vision, we only begin providing service in areas that meet our quality standards.

■ Outline of the GLOBAL WiFi® Service

- Service details : Mobile Wi-Fi router rental service for overseas use
- Rental fees : As low as JPY500 per day
- Service area : More than 200 countries and regions worldwide
- Application methods : Website (<https://townwifi.com>), airport service counters, telephone call
