## 1. Qualitative information on financial results for the current settlement

### (1) Explanation on operating results

#### Overview of the first half ended March 31, 2025 (Period from October 1, 2024 to March 31, 2025)

The Group is actively engaged in the healthcare business and the school DX business, both of which are expected to expand in the future, in order to enhance its corporate value over the medium to long term.

Net sales increased to ¥14,885 million (up 10.1% year-on-year), mainly due to sales growth in the healthcare and school DX businesses, and gross profit increased to ¥11,091 million (up 12.0% year-on-year) due to higher net sales.

Operating income increased ¥1,639 million (up 55.8% year-on-year) as a result of an increase in gross profit, which offset an increase in selling, general and administrative expenses (SG&A) due to higher advertising expenses.

Ordinary income increased to ¥1,721 million (up 13.4% year on year). In the same period of the previous fiscal year, the company recorded ¥510 million in equity in earnings of affiliates, primarily due to the recognition of extraordinary income by Shobunsha Holdings, Inc., an equity-method affiliate. However, for the second quarter (cumulative) of the current fiscal year, equity in earnings of affiliates declined significantly to ¥92 million, resulting in only a moderate increase in ordinary income.

Profit attributable to owners of parent increased to ¥1,757 million (up 12.7% year-on-year), mainly due to a consumption tax refund at the same level as in the same period of the previous year.

Other	1,018	980	+37	+3.8

Operating results by segment are as follows.

### ① Content business

The content business includes B2C monthly billing services (excluding the “Luna-Luna” healthcare service for women and the “CARADA medica” health Q&A service in cooperation with healthcare professionals) and the B2B original comic distribution business that offers original comic content to comic distributors.

The number of paid subscribers in this segment increased to 3.21 million (an increase of 130,000 from the end of September 2024), driven by the impact of the acquisition of a company engaged in music distribution and related services, as well as strong performance in new subscriptions via carrier shops. Even excluding the impact of the acquisition, the number of paid subscribers slightly increased, supported by continued growth in services such as the security-related app *AdGuard*.

Net sales increased to ¥8,650 million (up 2.6% year-on-year).

Operating income decreased to ¥1,978 million (down 12.5% year-on-year) due to an increase in advertising and promotional expenses associated with efforts to promote subscriptions to services such as *AdGuard*.

### ② Healthcare business

The healthcare business includes B2C monthly billing services under the *Luna-Luna* and *CARADA medica* brands and B2B and B2B2C healthcare services for medical institutions and local governments, such as the cloud drug record service, the maternal health record book app and the childcare DX service.

The number of monthly paid subscribers in this segment stood at 500,000 (a slight decrease of 10,000 from the end of September 2024), remaining largely flat. Meanwhile, the number of pharmacies implementing the cloud-based medication history service reached a record high on a quarterly basis, as the company focused on expanding installations at medium- to large-sized pharmacy chains. As of the end of March 2025, the number of such pharmacies totaled 3,027, an increase of 499 from the end of September 2024.

Net sales increased to ¥3,155 million (up 20.6% year-on-year), mainly due to the growth in cloud-based medication history sales.

Operating income decreased to ¥86 million (down 60.1% year-on-year), as earnings from the cloud-based medication history service increased, while the company made upfront investments for the development of new solutions.

### ③ School DX business

The school DX business includes school DX business developed for educational institutions by the consolidated subsidiary Motivation Works Inc.

Net sales increased significantly to ¥904 million (up 73.4% year-on-year), driven by an increase in monthly subscription sales from the cloud-based school affairs support system *BLEND*, which had been introduced at 775 schools as of April 2024 (an increase of 234 schools compared to April 2023), as well as initial development revenue from public school projects.

Operating income increased significantly to ¥272 million (loss of ¥156 million in the same period of the previous year), reflecting the substantial increase in net sales.

### ④ Other business

Other business includes the B2B AI business operated by Automagi Inc., a consolidated subsidiary, and the corporate DX support business and solution business.

Net sales increased to ¥2,898 million (up 9.3% year-on-year), supported by steady growth in orders from the corporate DX support business.

Operating income increased significantly to ¥628 million (loss of ¥36 million in the same period of the previous year), reflecting the increase in net sales.

## (2) Explanation on financial position

### ① Assets, liabilities and net assets

At the end of the first half under review, total assets increased ¥1,018 million from the end of September 2024, to ¥30,704 million.

Current assets rose ¥780 million mainly due to increases in cash and deposits, notes and accounts receivable, and contract assets. Non-current assets rose ¥238, mainly reflecting increases in investment securities and software.

Current liabilities decreased ¥121 million, as the increase in accrued corporate taxes was offset by a decline in contract liabilities. Non-current liabilities fell ¥276 million chiefly due to a decline in long-term borrowings.

Net assets increased ¥1,415 million, mainly due to the recording of ¥1,757 million as profit attributable to owners of parent, as well as capital increases at consolidated subsidiaries.

## ② Consolidated cash flows

At the end of the first half of the fiscal year under review, cash and cash equivalents were ¥15,240 million, up ¥412 million from the end of September 2024. Cash flow by activity and principal factors in the first half under review are as follows:

Net cash provided by operating activities was ¥1,974 million (inflow of ¥1,241 million for the first half of the previous fiscal year). Principal factors included profit before income taxes.

Net cash used in investing activities resulted in an outflow ¥789 million (outflow of ¥609 million in the same period of the previous fiscal year). Major factors included expenditure for the purchase of intangible assets (mainly software).

Net cash used in financing activities resulted in an outflow ¥770 million (outflow of ¥928 million in the same period of the previous fiscal year), as capital increases at consolidated subsidiaries were outweighed by payments for dividends and repayments of long-term borrowings.

## (3) Explanation of future forecast information including consolidated forecast

The Company will focus on expanding sales and profits in the healthcare business and school DX business, which are expected to drive future growth. Additionally, in the content business, we will work to maintain profitability by increasing the number of paid subscribers for the security-related app *AdGuard* and expanding our original comics business.

The consolidated earnings forecast for the fiscal year ending September 2025 incorporates the reduction in amortization expenses due to the completion of amortization for goodwill and customer-related assets of the music distribution business acquired on December 1, 2019.

The healthcare business, which we have been engaged in over the medium- and long-term, has great future growth potential, more than that of the B2C type. This business may move toward a more stable stock-type business through the establishment of long-term business relationships with customers. Therefore, we will commit to implementing a variety of measures to achieve sales growth.

In the cloud-based medication history, interest from dispensing pharmacies remains strong, contributing to sustainable sales and profit growth for this business. We aim to further expand the number of adopting stores by strengthening our collaboration with our partner, Medipal Holdings Corporation. Additionally, we will promote the expanded sales of our AI-powered medication history input support service, which utilizes ChatGPT and has seen high demand due to its contribution to improving pharmacists' work efficiency. Through these initiatives, we will work to increase the number of adopting stores and further enhance profitability.

In the childcare DX initiatives, amidst the government's promotion of digitalizing maternal and child health information, we will work to expand the adoption of the maternal and child health app *Boshimo* among municipalities. Our strategy includes vigorously promoting the expansion of our childcare DX services, particularly in municipalities that have already implemented *Boshimo*. Furthermore, we aim to advance our *Boshimo* platform strategy by facilitating digital collaboration among municipalities, hospitals, and residents. Through these efforts, we intend to establish this business as one of our cores, profit-contributing segments over the medium to long term.

In the School DX business, the company aims to achieve sustainable growth by actively expanding operations in response to government-led initiatives promoting DX of school administration at the prefectural level. Demand for the cloud-based school affairs support system *BLEND* remains strong, with the number of schools scheduled to implement the system increasing to 1,067 as of April 2025, a rise of 292 schools compared to April 2024. While sales activities had previously focused mainly on private schools, the company has begun to strengthen efforts in the public school sector as well, following the signing of a system implementation contract with the Yamanashi Prefectural Board of Education in August 2024 for use in prefectural high schools. Through this expansion, the company aims to further grow both revenue and profit.

[Assumptions for forecast values]

The impact of undetermined new businesses and low-probability mergers and acquisitions in the Group are not taken into account and are not incorporated in the forecast figures. The Company will promptly disclose any deviation between forecasts and results that should be disclosed.

#### 4) Notes concerning interim consolidated financial statements

(Notes concerning going concern assumption)

Not applicable.

(Notes in the event of significant changes in shareholders' equity)

Not applicable.

(Change in accounting policies)

(Application of Accounting Standards for Income Taxes, Local Inhabitant Taxes and Enterprise Taxes, etc.)

The Company has applied the "Accounting Standard for Income Taxes, Local Inhabitant Taxes and Enterprise Taxes" (ASBJ Statement No. 27, October 28, 2022), the "Accounting Standard for Presentation of Comprehensive Income" (ASBJ Statement No. 25, October 28, 2022), and the "Implementation Guidance on Tax Effect Accounting" (ASBJ Guidance No. 28, October 28, 2022) effective from the beginning of the current consolidated fiscal period. These changes in accounting policies had no impact on the consolidated financial statements for the interim period.

Additionally, with respect to the revision regarding the treatment in consolidated financial statements of gains or losses arising from sales of subsidiary shares among consolidated group companies, in cases where such gains or losses are deferred for tax purposes, the Company has applied the 2022 revised implementation guidance from the beginning of the current interim consolidated fiscal period. These changes in accounting policies also had no impact on the consolidated financial statements for the interim period.

3. Matters related to changes in reportable segments, etc.

In response to the expansion of the school DX business, the Company has revised the classification of certain transactions previously recorded under the “Others” segment as part of the DX support business, in order to more accurately reflect the performance of each reportable segment within the Group. Effective from the current interim consolidated fiscal period, these transactions have been reclassified and are now included in the school DX business segment.

For reference, the segment information for the previous interim consolidated cumulative period has been prepared based on the revised classification.
